Correct It's a fabulous way to exercise your creativity and try new things that maybe you can't reason.	ı't do at work for whatever	
It is not a large time commitment.  You didn't select all the correct answers		
5. On which social network is the Tableau community most active?  Facebook  LinkedIn  Twitter  Instagram		1/1 point
✓ Correct  The Tableau community is most active on Twitter.		
<ul> <li>True or False: Executives, other internal clients, and external customers will spend about the reading a data visualization</li> <li>True</li> <li>False</li> </ul>	same amount of time	1 / 1 point
Correct  Different types of users all have different needs and wants when it comes to interprevize. If you know your audience well, you can design with this in mind.	eting and reading a data	
7. True or False: You need to be well-versed in the data to visualize the data  O False  True  True		1 / 1 point
✓ Correct If you don't understand your data well enough, your end user will be able to tell, and	d they won't get it either.	
8. What is the approximate maximum number of colors you should use in a viz?  3  5  7  10		0 / 1 point

Incorrect Please revisit the lesson: Five Best Practices for Visualization

O Purple vs pink Orange vs blue Red vs blue Orange vs green

0 / 1 point

1/1 point

1/1 point

9. Which is the best color-blind-friendly alternative to the traditional red-green color palette used for showing "bad" vs

Please revisit the lesson: Five Best Practices for Visualization

"good" or "down" vs "up"?

Incorrect

✓ Correct

Remove all axis lines.

take in the information in your viz.

10. Which is more correct? 1/1 point When building a visualization, you should use every last pixel on the page to show information, to make it worth the time it takes for a user to read your viz.

✓ Correct Just like when you write a sentence, you should use punctuation and spaces to indicate when the reader should take a breath or pause for effect.

When building a visualization, you should leave plenty of space between elements to allow the user to breathe and

11. Which is more correct? It is best to not show your viz to your user until you have completed work, thus increasing the surprise and "Wow!" factor.

It is best to get feedback early and often, to make sure your viz will meet your users' needs and understanding.

Spare yourself the heartache that comes from wiling away the hours on something that doesn't meet your user's needs.

12. Which of the following are things you can do to "declutter" a visualization, because "less is usually more"? Use a month abbreviation instead of the month number

✓ Correct Minimize the use of numbers unless they are part of the data, to make your data the star of the show.

Consider whether you need to show the y-axis if you have any data points labeled.

✓ Correct Contrary to what your middle school science teacher told you, you might not need to show a y-axis at all if you

are labeling any data points. Remove all words and labels
